## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Criddle et al. Criddle et al show everything except the specific disclosure of an air cleaner upstream of the first compressor 20. It would have been obvious if not inherent that an air cleaner would be utilized. This is conventional, and it is doubtful that the engine would function properly without it.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 5, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Criddle et al. Criddle et al show everything except the specific type of compressor utilized. Note that the various types of compressors cited in the above claims are art recognized alternatives known for the same purpose, and do not constitute a patentable distinction over the Criddle et al reference.

***Allowable Subject Matter***

Claims 3, 5, 7, and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9-25 are allowed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the air cleaner of Enright (5,499,616).
